ABOUT US

Better Timber and Panel Solutions from the Ground Up

The Botica Group brings together a range of specialised businesses across the timber and panel industry, delivering plywood, timber, veneer, high-pressure laminate (HPL) and PVC panel solutions throughout New Zealand.

By combining material supply with in-house manufacturing capabilities, we connect every stage of the process - from raw product through to finished surface solutions.

This integrated approach allows us to support architects, designers, fabricators, joiners, builders, merchants, and DIY customers with practical, reliable solutions for projects of all sizes.

LEGACY

A Message from the Managing Director

The Botica Group is more than a business to me, it's something I've grown up in.

From a young age, I was surrounded by the day-to-day of Botica Timber Services, learning firsthand the values my parents, Ivan and Marsha Botica, built the business on - hard work, quality, and a genuine commitment to doing right by our customers.

My father always lived by the belief that "It's the quality that matters and the service which counts," and that has stayed with me throughout my life.

Taking over the business was never just about growth, it was about continuing what Mum and Dad started with that same ethos.

Today, although the Botica Group has grown into a network of specialised businesses across the timber and panel industry, our foundation of genuine care about our clients and products remains the same.

This business is part of our family, and something I am proud to carry forward, not only to honour my parents, but to build something meaningful to pass on to my own children.

Matthew Botica

WHY CHOOSE US?

We Deliver Dependable Outcomes Through Knowledge, Capability, and Practical Support

Decades of Experience

Built on over 50 years of industry knowledge, with more than 30 years of proven business experience, we bring trusted expertise to every project.

Uncompromising Quality

From raw materials to finished products, we maintain high standards at every stage to ensure consistent quality, durability, and performance.

Comprehensive Solutions

Our integrated supply chain - from sourcing and manufacturing to distribution - means we can support your project efficiently from start to finish.

Personalised Service

As a family-owned business, we take pride in building strong relationships with our customers, offering expert advice and tailored solutions.

Sustainability Commitment

We prioritise responsible sourcing and sustainable practices to protect New Zealand's natural resources for future generations to come.

BOTICA TIMBER

SERVICES LTD

Specialist Solid Timber Machining and Processing Solutions

Botica Timber Services Ltd (BTS) is the Botica Group's dedicated timber processing division.

BTS specialises in the custom cutting and machining of solid timber across a wide range of species, supporting customers within the construction, joinery, and manufacturing sectors, with the flexibility to process customer-supplied timber or source and supply materials to support the following services:

TIMBER MACHINING

Machining a wide range of timber species to specific sizes and profiles using high-capacity planers and saws.

BAND RE-SAWING

Processing larger sections of timber with accuracy and efficiency, suited to demanding or oversized material requirements.

TIMBER OILING

Providing a consistent, factory-applied finish for selected timber products, including weatherboards and decking.

IN-HOUSE KNIFE MANUFACTURING

Producing custom profiles using in-house knife grinding equipment to ensure accuracy and repeatability.

BOTICA
GROUP

BOTICA & CO PRESSING SERVICES LTD

Custom Pressing Solutions for Veneer, HPL, and Decorative Panel Applications

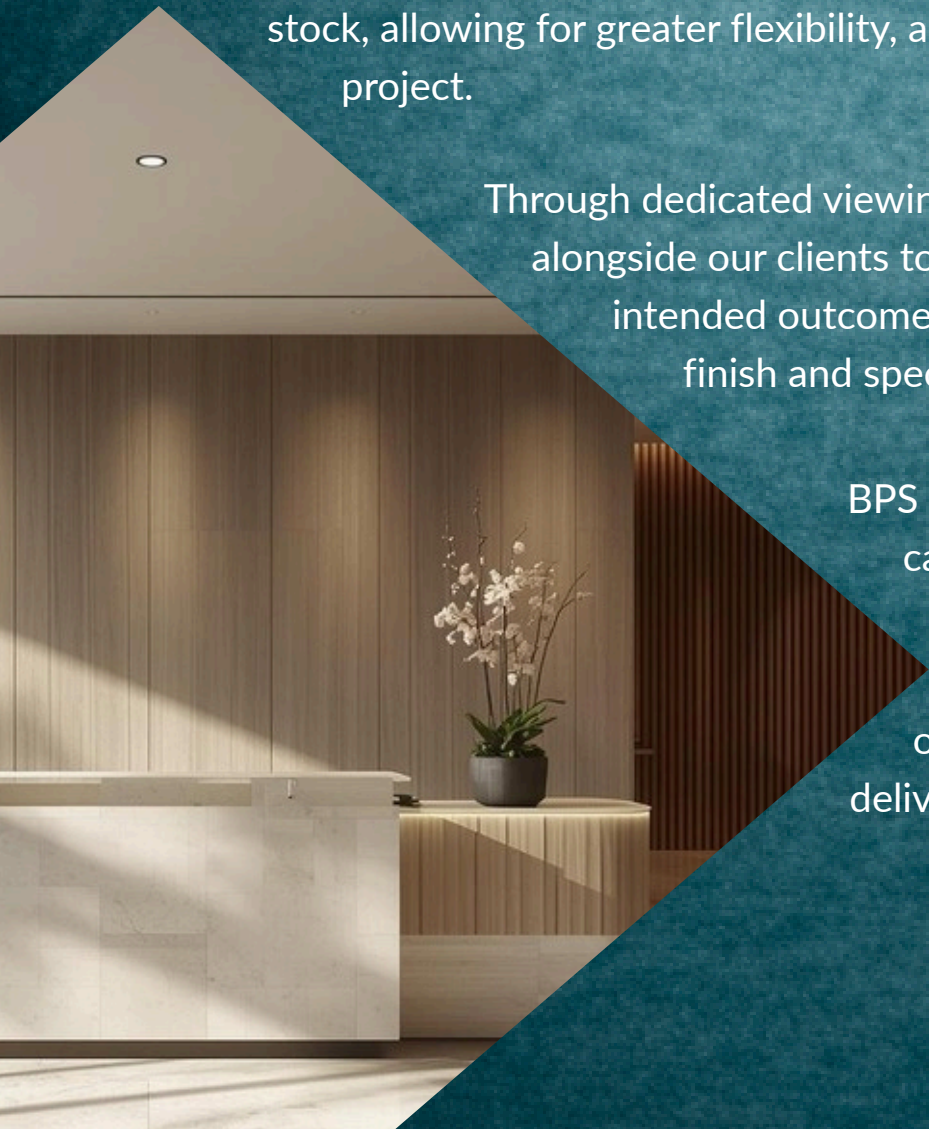

Botica & Co Pressing Services (BPS) is the Botica Group's manufacturing division, working closely with trade clients such as joiners and fabricators, to deliver fully customised pressed panel solutions.

Operating as the production arm behind Ultima, BPS specialises in pressing timber veneer and high-pressure laminate (HPL) onto a range of substrates to suit specific project requirements.

All work is completed on a made-to-order basis, with no pre-pressed panels held in stock, allowing for greater flexibility, accuracy, and control over each project.

Through dedicated viewing and review sessions, we work alongside our clients to ensure each panel meets the intended outcome, supporting precision in both finish and specification.

BPS provides flexible manufacturing capability across a selection of species and decors, ensuring every panel is tailored to its own unique application and delivered with consistency.

BOTICA
GROUP

PLYMAN

Your One-Stop Specialist Plywood & Panel Shop

Plyman is the Botica Group's specialist plywood and panel supply division, offering a comprehensive range of products to support projects across construction, joinery, and general building applications.

From humble beginnings as a subsidiary of Gibson Veneer Panels (GVP) in 1994, Plyman has grown to become a leading name in the ply and panel industry.

After the challenges faced by GVP, Matthew Botica re-positioned the business in 2014, focusing on making "hard to find" products accessible to the public.

Today, Plyman offers New Zealand's most extensive range of plywood panels, including marine grade, furniture grade, structural building grade, and general-purpose ply.

Our commitment to great products and excellent service has driven our growth and customer satisfaction.

At Plyman, we pride ourselves on providing expert advice and a convenient drive-in location.

We cater to all project sizes and ensure you receive the most suitable panel for your needs.

BOTICA
GROUP

TIMBERMAN

Accessible Timber Supply for Trade and DIY Projects

Timberman is the Botica Group's retail timber division, established in 2016, which provides a clear and accessible range of dressed exotic and locally sourced timbers.

With a defined timber range, Timberman makes it easy for customers to select products suited to common building and finishing applications, including decking, flooring, weatherboards, and interior lining.

Focused on simplicity and reliability, Timberman supports both trade and DIY customers with consistent product availability and straightforward service.

Helping customers confidently select the right timber for their specific application, with a clear understanding of suitability, performance, and end use.

BOTICA
GROUP

ULTIMA

Architectural Surface Solutions for Refined Interior Applications

Ultima is the Botica Group's architectural surface division, working closely with architects and designers to deliver considered material solutions for high-end interior spaces.

Focused on timber veneer, high-pressure laminate (HPL), and solid timber applications, Ultima provides access to a curated range of options suited to commercial and residential projects.

This includes veneer layons for viewing and selection, to solid timber feature panelling and battens, each element is selected to bring warmth, depth, and natural texture into a space.

Supported by in-house manufacturing through Botica Pressing Services, Ultima enables full customisation across panel construction, ensuring materials are aligned with design intent, performance requirements, and project-specific outcomes.

Through a structured and collaborative approach, Ultima supports the specification process from material selection through to final production, ensuring clarity, consistency, and confidence at every stage.
